Longair, M. S. and P. F. Scott, The luminosity distribution of radio galaxies	379
Lynden-Bell, D., P. Goldreich and, I: Gravitational stability of uniformly rotating disks ...	97
Lynden-Bell, D., P. Goldreich and, II: Spiral arms as sheared gravitational instabilities ...	125
Lyttleton, R. A., Note on the structure of Mars	95

Moon and Planets:

— Observations of lunar luminescence at visual wavelengths, C. D. Scarfe	19
— Studies in astronomical polarimetry, III: The wavelength dependence of the polarization of light reflected by the Moon and Mars, D. Clarke	83
— Note on the structure of Mars, R. A. Lyttleton	95
— Sudden changes in the motion of Jupiter's Great Red Spot during 1962, B. M. Peek ...	423

Peach, G., A general formula for the calculation of absorption cross sections for free-free transitions in the field of positive ions	361
----------------------------------------------------------------------------------------------------------------------------------------------	-----

Peek, B. M., Sudden changes in the motion of Jupiter's Great Red Spot during 1962 ...	423
---------------------------------------------------------------------------------------	-----

Radio Astronomy:

— The luminosity distribution of radio galaxies, M. S. Longair and P. F. Scott	379
— The spectrum of the galactic radiation below 10 Mc/s, G. R. A. Ellis	429

Ravi Bhavilai, The structure of the solar chromosphere, I: Identification of spicules on the disk	411
----------------------------------------------------------------------------------------------------------	-----

Ring, J., F. H. Flynn and, The development of a photoelectric Fabry-Perot interferometer for the measurement of radial velocities in diffuse nebulae	1
-------------------------------------------------------------------------------------------------------------------------------------------------------------	---

Roxburgh, Ian W., A note on the boundary of convective zones in stars	223
------------------------------------------------------------------------------	-----

Scarfe, C. D., Observations of lunar luminescence at visual wavelengths	19
--------------------------------------------------------------------------------	----

Scott, P. F., M. S. Longair and, The luminosity distribution of radio galaxies... ..	379
--------------------------------------------------------------------------------------	-----

Shuttleworth, M., M. W. Feast and, The kinematics of B stars, cepheids, galactic clusters and interstellar gas in the Galaxy	243
-------------------------------------------------------------------------------------------------------------------------------------	-----

Shuttleworth, M., A. J. Wesselink and, 45 variable stars in the Small Magellanic Cloud ...	443
--------------------------------------------------------------------------------------------	-----

Stars, Magnitudes of:

— An infrared survey of the region of SA 193, Bengt E. Westerlund... ..	45
— Photoelectric observations of Magellanic Cloud cepheids, S. C. B. Gascoigne and G. E. Kron	333
— 45 variables in the Small Magellanic Cloud, A. J. Wesselink and M. Shuttleworth ...	443

Stars, Motions of:

— Radial velocities of 200 southern B stars, William Buscombe and P. Morris Kennedy ...	281
-----------------------------------------------------------------------------------------	-----

Stars, Spectra of:

— A high-dispersion spectral study of RY Sagittarii, I. J. Danziger	199
----------------------------------------------------------------------------	-----

Stars, Structure and Evolution of:

— A note on the boundary of convective zones in stars, Ian W. Roxburgh... ..	223
------------------------------------------------------------------------------	-----

Summaries:

— Publications of the Royal Observatory, Edinburgh, Vol. III, Nos. 5-9, 1965	229
— Memoirs of the Royal Astronomical Society, Vol. 69, parts 4 and 5, 1965	231

Sun:

— The structure of the solar chromosphere, I: Identification of spicules on the disk, Ravi Bhavilai	411
------------------------------------------------------------------------------------------------------------	-----

Universe—Cosmology:

— The background radiation in homogeneous isotropic world-models, II, G. J. Whitrow and B. D. Yallop	31
-------------------------------------------------------------------------------------------------------------	----

Wesselink, A. J. and M. Shuttleworth, 45 variable stars in the Small Magellanic Cloud ...	443
-------------------------------------------------------------------------------------------	-----

Westerlund, Bengt E., An infrared survey of the region of SA 193	45
-------------------------------------------------------------------------	----

Whitrow, G. J. and B. D. Yallop, The background radiation in isotropic world-models, II ...	31
---------------------------------------------------------------------------------------------	----

Williams, I. P., M. J. Baines and A. S. Asebiomo, Resistance to the motion of a small sphere moving through a gas	63
--------------------------------------------------------------------------------------------------------------------------	----

Willstop, R. V., A wide-field, coma-free all-reflection plane grating spectrometer	233
-------------------------------------------------------------------------------------------	-----

Yallop, B. D., G. J. Whitrow and, The background radiation in homogeneous isotropic world-models, II	31
-------------------------------------------------------------------------------------------------------------	----
